

2020

Korea Maritime Week

Seoul (Virtual), Republic of Korea, 18th to 19th November 2020 (GMT+9)

Join us for 2020 Korea Maritime Week!

The Ministry of Oceans and Fisheries will host the 2020 Korea Maritime Week under the theme of the 'Post COVID-19, Digitalization and Decarbonization in shipping' through a 2-day event which will take place from Wednesday 18th to Thursday 19th November 2020.

2020 Korea Maritime Week will provide an interactive platform to bring together shipping experts at home and aboard, the International Maritime Organization(IMO), and the audience from around the world to actively engage in information sharing and discussions on pressing issues in the global maritime sector such as maritime safety and marine environment.

This event will consist of a special session and three sessions, aimed at exploring ways forwards to foster sustainability in the maritime sector by addressing and discussing the impacts of the global COVID-19 crisis and the future prospects of the maritime sector as well as sharing information on digitalization in shipping, domestic and foreign decarbonization policies, and the industrial trends.

We hope the event serves as a venue where all participants connect together to examine key challenges and opportunities for new growth in shipping in the post COVID-19 era.

This year, the event will be held virtually due to the ongoing COVID-19 pandemic.
We welcome you to the conference and look forward to your participation.
